Childrearing & Education in Inazawa!

Children are the treasures of our families, communities, and cities. Above all else, it is important to create an environment where children can grow up healthy. As the environment surrounding children changes rapidly, we need to think about the children's best interests and proactively provide support for the parenting generation. In Inazawa City we are striving to achieve appealing urban development with the basic

philosophy of "Childrearing through thoughtful support of the community."
